Intersec Buenos Aires 2026: the meeting point where security looks to the future

Buenos Aires, April 2026.- From September 2 to 4, 2026, La Rural Trade Center will once again host Argentina's only comprehensive security event and the most important one in South America. Organized by Messe Frankfurt Argentina, together with the Argentine Chamber of Safety (CAS) and the Argentine Chamber of Electronic Security (CASEL), Intersec Buenos Aires will arrive with an expanded proposal and an agenda full of activities.

The event brings together the entire value chain of the security sector: safety consultants, integrators, experts in occupational health and safety, electronic engineers, network and communications technicians, contractors, construction industry professionals, firefighters and business leaders. It is a space designed not only to discover products, but also to generate business, build partnerships, and anticipate trends in a constantly evolving market.

Intersec Buenos Aires goes beyond a commercial exhibition. Its strength lies in the comprehensive experience it offers. Over the three days, attendees will be able to take part in a full academic program, including the **VIII National Congress of Ergonomics and Human Factors** and the **National Conference on Occupational and Environmental Hygiene**.

In addition, the traditional exhibitor conferences will showcase product launches, innovative solutions, and real-life application cases. This is complemented by the **Outdoor Demonstration Area**, where companies will present their latest developments, technologies, and applications in action.

Intersec Buenos Aires 2026 represents a unique opportunity to understand where the industry is heading, discover solutions, exchange knowledge, and be part of the future of the sector.

For three days, security once again takes center stage at Intersec Buenos Aires.

Companies interested in participating as exhibitors in the 2026 edition can contact the sales team: Laura Fredes – laura.fredes@argentina.messefrankfurt.com
